Microservice Coding Task

Problem – Develop a microservice to manage students and course registration. A student can register in zero or more courses and a course can have zero or more students.

Acceptance Criteria

- I should be able to add and remove a student
- I should be able to add and remove a course
- I should be able to register a student in a course
- I should be able to retrieve all students, sorted by their name, for a given course with course name as input
